## FOR IMMEDIATE RELEASE

### Bancroft / Jack Brown Airport Upgrades Jet Fuel Dispensing System

**Bancroft, Ontario, Monday, September 23, 2013.** Lynn Davis, President of the Bancroft Flying Club announced today that the Bancroft Flying Club, owner and operator of the Bancroft / Jack Brown Airport has just completed a significant upgrade to the Jet A-1 fuel dispensing system.

The Bancroft Airport has provided Jet fuel for decades supporting numerous helicopter operators that frequent the area such as Ontario Ministry of Natural Resources, Ontario Hydro, Ontario Provincial Police, Department of National Defense, Ornge Air Ambulance and commercial geophysical survey companies.

The airport is in a strategic location vital for the supply of Jet fuel in the region as it is the only Jet fuel available from Haliburton in the west to the Ottawa valley airports in the east or Peterborough and Kingston in the south to North Bay in the north.

Jet fuel had been dispensed from an old upright pump and has now been replaced with a newly refurbished and rebuilt cabinet system with much higher output and includes an electrically operated reel for retracting the hose after use (see photos below).

Old Dispenser

New Cabinet Style Dispenser

Fuel is available by calling the individuals listed on our website at <http://www.bancroftflyingclub.ca/aerodrome-and-facilities.html> or phone numbers posted on the clubhouse. The procedures for customers authorized for Self-Serve remain the same.

For further information contact Gary Gaudreau, Secretary, Bancroft Flying Club by email at [info@bancroftflyingclub.ca](mailto:info@bancroftflyingclub.ca) or phone (613) 332-6272.
